1. General information

Samvardhana Motherson Auto Component Private Limited was incorporated in India on 23 December 2014 to engage in activities of manufacturing, assembling, selling, marketing, importing, exporting, sourcing, tooling, purchasing raw material for all kinds of parts, sub- parts for automobiles, automotive and related industry. On 7 July 2022 the Company having by special resolution changed its registered office from 2nd floor, F-7 Block B-1, Mohan Cooperative Industrial Estate Mathura Road Delhi-110044 to Unit-705, C Wing, One BKC, G-Block, Bandra Kurla Complex, Bandra East, Mumbai City, Maharashtra, India, 400051. Its manufacturing unit is in IMT Bawal, Rewari, Haryana-123501.

Up to 20 January 2022 erstwhile Samvardhana Motherson International Limited (SAMIL) held 100% shareholding (including 600 shares held by nominees) of the company. The Hon'ble National Company Law Tribunal, Mumbai Bench vide its Order dated 22 December 2021 sanctioned the composite scheme of amalgamation and arrangement amongst Motherson Sumi Systems Limited (MSSL) and SAMIL resulting in merger of SAMIL with MSSL. The appointed and effective date of the merger is 21 January 2022. Accordingly, equity shares held by SAMIL in the company stand transferred to MSSL on 21 January 2022 which then becomes the company's holding company w.e.f. 21 January 2022. Also, nominees holding 600 equity shares become nominees of MSSL w.e.f. the said date.
The name of Motherson Sumi Systems Limited (MSSL) was changed to Samvardhana Motherson International Limited (SAMIL) w.e.f. 18 May 2022.

2.1 Material accounting policies.

a. Basis of preparation

Compliance with Ind- AS

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind-AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time).

The holding company has re-confirmed its intention to continue to provide adequate financial support to the Company for its operations for the foreseeable future. Also, based on the turn around strategy adopted by the Company, considering consolidation of operations, growth in sales and cost reduction, the management projects that the Company will generate profits in future. Based on the above, the management believes that the Company will continue as a going concern and thereby realize its assets and discharge its liabilities in the normal course of its business.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments) which have been measured at fair value or revalued amount.

The financial statements are presented in INR and all values are rounded to the nearest INR lakh, except when otherwise indicated.

b. Presentation of financial statements

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind-AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time).
Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognized amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following.

(i) The normal course of business
(ii) The event of default
(iii) The event of insolvency or bankruptcy of the Company and/or its counterparties

Summary of material accounting policies

c. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

(All amounts in INR lakh, unless otherwise stated)

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

d. Foreign currencies

(i) Functional and presentation currency

The Company's functional currency is Indian Rupee (INR) and the financial statements are presented in Indian Rupee (INR).

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end.

Exchange rates are generally recognized in profit or loss. They are deferred in other comprehensive income if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation. A monetary item for which settlement is neither planned nor likely to occur in the foreseeable future is considered as a part of the entity's net investment in that foreign operation.

Foreign exchange differences regarded as an adjustment to borrowing cost are presented in the Statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the Statement of profit and loss on a net basis within other income or other expenses.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equity investments (other than investment in subsidiaries, joint ventures and associates) classified as FVOCI are recognized in other comprehensive income.

e. Revenue recognition and other income

The Company recognizes revenue from contracts with customers based on a five-step model as set out in IND AS 115.

***Step 1.* Identify contract(s) with a customer:** A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

***Step 2.* Identify performance obligations in the contract:** A performance obligation is a promise in a contract with a customer to transfer a good or service or both to the customer.

***Step 3.* Determine the transaction price:** The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services or both to a customer, excluding amounts collected on behalf of third parties.

***Step 4.* Allocate the transaction price to the performance obligations in the contract:** For a contract that has more than one performance obligation, the Company allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation.

***Step 5.* Recognise revenue when (or as) the Company satisfies a performance obligation.**

The Company satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met.

(a) The Company’s performance does not create an asset with an alternate use to the Company and the Company has an enforceable right to payment for performance completed to date.

(b) The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced.

(c) The customer simultaneously receives and consumes the benefits provided by the Company's performance as the Company performs.

For performance obligations where one of the above conditions are not met, revenue is recognized at the point in time at which the performance obligation is satisfied.

When the Company satisfies a performance obligation by delivering the promised goods or services or both it creates a contract-based asset on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognized this gives rise to a contract liability.

Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes and duty. The Company assesses its revenue arrangements against specific criteria to determine if it is acting as principal or agent.
Revenue is recognized to the extent it is probable that the economic benefits will flow to the Company and the revenue and costs, if applicable, can be measured reliably.

Sales of goods:
Revenue is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Sales are recognised when the significant risks and rewards of ownership are transferred to the buyer as per the terms of contract.

Sales of services:

Revenues from the sale of services are recorded with respect to the stage of completion as of the reporting date in relation to the total service to be provided in the course of the transaction.

Duty drawback and export incentives

Income from duty drawback and export incentives is recognized on an accrual basis.

f. Income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in India. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the standalone financial statements. Deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized for all deductible temporary differences only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are off set when there is a legally enforceable right to off-set current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the entity has a legally enforceable right to off-set and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

g. Leases – Ind AS 116

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

As a Lessee

SMAC (the Company) applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. SMAC recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Assets	Lease Period
Building	10 Years
Motor Vehicles	3-5 Years
Plant & Machinery	3-5 Years

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section 2 (h) Impairment of non-financial assets

ii) Lease Liabilities.

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

- Quantitative disclosures and other disclosures are in **(note 43)**

As a Lessor

Lease income from operating leases where the Company is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate the lessor for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their respective nature.

h. Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

(All amounts in INR lakh, unless otherwise stated)

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used. Impairment losses including impairment on inventories are recognized in the statement of profit and loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss.

Intangible assets with indefinite useful lives are tested for impairment annually at the end of the financial year at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

i. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand short term deposits with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

j. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortized cost
- Debt instruments at fair value through other comprehensive income (FVOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVPL)
- Equity instruments measured at fair value through other comprehensive income (FVOCI)

Debt instruments at amortized cost

(a) A 'debt instrument' is classified as at the FVOCI if both of the following criteria are met:
The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the profit or loss. The losses arising from impairment are recognized in the profit or loss.

(b) This category generally applies to trade and other receivables.

Debt instrument at FVOCI

A 'debt instrument' is classified as at the FVOCI if both of the following criteria are met:

(a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

(b) The asset's contractual cash flows represent SPPI.

(c) Debt instruments included within the FVOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognized in OCI is reclassified from the equity to statement of profit and loss. Interest earned whilst holding FVOCI debt instrument is reported as interest income in statement of profit and loss using the EIR method.

Debt instrument at FVPL

FVPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVOCI, is classified as at FVPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVOCI criteria, as at FVPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVPL.

Debt instruments included within the FVPL category are measured at fair value with all changes recognized in the statement of profit and loss.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognized by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.
Equity instruments included within the FVPL category are measured at fair value with all changes recognized in the P&L.

De-recognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Company's balance sheet) when**:**
(a) The rights to receive cash flows from the asset have expired, or
(b) The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement and either (i) the Company has transferred substantially all the risks and rewards of the asset, or (ii) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

(a) Financial assets that are debt instruments, and are measured at amortized cost e.g., loans, debt securities, deposits, trade receivables and bank balance.
(b) Financial assets that are debt instruments and are measured as at FVOCI.
(c) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115.
(d) Loan commitments which are not measured as at FVPL.
(e) Financial guarantee contracts which are not measured as at FVPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.
For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected under the head 'other expenses' in the P&L. The balance sheet presentation for various financial instruments is described below:

(All amounts in INR lakh, unless otherwise stated)

- Financial assets measured as at amortized cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount.
  Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e., as a liability. Debt instruments measured at FVOCI: For debt instruments measured at FVOCI, the expected credit losses do not reduce the carrying amount in the balance sheet, which remains at fair value. Instead, an amount equal to the allowance that would arise if the asset was measured at amortized cost is recognized in other comprehensive income as the 'accumulated impairment amount'.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109.

(All amounts in INR lakh, unless otherwise stated)

Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated Ind AS as FVPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other
changes in fair value of such liability are recognized in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

This category generally applies to borrowings and other payables.

Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognized less cumulative amortization.

De-recognition

A financial liability is de-recognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on

substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original
liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

Embedded derivatives

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a standalone derivative. An embedded derivative cause some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if there
Economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognized in statement of profit and loss, unless designated as effective hedging instruments.

Off- setting of financial instruments

Financial assets and financial liabilities are off set and the net amount is reported in the balance sheet if there is a currently enforceable legal right to off-set the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

k. Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.
A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for distribution in discontinued operations.

External valuers are involved for valuation of significant assets and liabilities, if any. At each reporting date, the Company analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

I. Property, Plant and equipment

Property, Plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Capital work in progress are stated at cost, net of accumulated impairment losses, if any. Such cost includes expenditure, net of any subsequent sale proceeds of items produced over the cost of testing, that is directly attributable to the acquisition of the items and the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent costs are included in the asset’s carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

The cost of self-generated assets comprises of raw material, components, direct labour, other direct cost and related production overheads.

On transition to Ind AS, the Company has elected to continue with the carrying value of all its property, plant and equipment recognized as on 01 April 2017 measured as per the previous GAAP and use that carrying value as the deemed cost of property, plant and equipment.

Depreciation methods and useful lives

Depreciation is calculated using the straight-line method over estimated useful lives of the assets:

Assets	**Useful lives (years)***
Leasehold improvements	Over the period of lease or useful life, whichever is lower
Plant & Machinery:	
(i) Plant & Machinery	01-10 years
(ii) Die & Molds	On the basis of shots produce
(iii) Electric installation	10 years
Furniture & fixtures	6 years

Office equipment	5 years
Computers	3 years

*Useful life of these assets is lower than the life prescribed under Schedule II to the Companies Act, 2013 and those has been determined based on an assessment performed by the management of expected usage of these assets. The assets residual values and useful lives are reviewed and adjusted if appropriate, at the end of each reporting period.

An item of property, plant and equipment and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is de-recognized.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

m. Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful live of other intangible assets are as follows:

Assets	**Useful life**
Software	3 years
Technical knowhow fees	4 years

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

On transition to Ind AS, the Company has elected to continue with the carrying value of all its intangible assets recognized as on 01 April 2017 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

n. Inventories

Raw materials and stores, work in progress and finished goods are stated at the lower of cost and net realizable value.

The cost of raw material and traded goods comprise cost of purchase and is determined after rebate and discounts. Cost of work in progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity.

Cost of inventories also includes all other costs incurred in bringing the inventories to their present location and condition. Costs are determined on a weighted average cost basis.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

o. Provisions, contingent liabilities, contingent assets and onerous contracts

Provisions

Provisions for legal claims, product warranties and make good obligations are recognized when the Company has a present (legal or constructive) obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Onerous contracts

If the Company has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. However, before a separate provision for an onerous contract is established, the Company recognises any impairment loss that has occurred on assets dedicated to that contract.

Contingent Liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

p. Employee benefits

Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

Provident Fund & Employee State Insurance

Contribution towards provident fund and employee state insurance for employees is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis. The Company recognizes contribution payable to the provident fund scheme as expenditure in the statement of profit and loss, when an employee renders the related service.

Gratuity

The Company provides for gratuity, a defined benefit plan (the "Gratuity Plan") covering eligible employees in accordance with the Payment of Gratuity Act, 1972. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment. The gratuity plan in the Company is unfunded.

The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds. Re-measurement of gains and losses arising from experience.

Adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. They are included in retained earnings in the statement of changes in equity and in the balance sheet. Past-service costs are recognized immediately in income.

Compensated Absences

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year end are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.

Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year end are treated as other long term employee benefits. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds. Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in statement of profit or loss in the period in which they arise. Past-service costs are recognized immediately in income.

q. Earnings per share

(i) Basic earnings per share

Basic earnings per share is calculated by dividing the net profit or loss attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly

paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period.
The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue that have changed the number of equity shares outstanding, without a corresponding change in resources.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:
- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- The weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.2 New and amended Standards

The Ministry of Corporate Affairs has notified Companies (Indian Accounting Standards) Amendment Rules, 2023 dated 31 March 2023 to amend the following Ind AS which are effective for annual periods beginning on or after 1 April 2023. The Company applied for the first-time these amendments.

(i) Definition of Accounting Estimates - Amendments to Ind AS 8
The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. It has also been clarified how entities use measurement techniques and inputs to develop accounting estimates.
The amendments had no impact on the Company's standalone financial statements.

(ii) Disclosure of Accounting Policies - Amendments to Ind AS 1
The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.
The amendments have had an impact on the Company's disclosures of accounting policies, but not on the measurement, recognition or presentation of any items in the Company's financial statements.

(iii) Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to Ind AS 12. The amendments narrow the scope of the initial recognition exception under Ind AS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences such as leases. The Company previously recognised for deferred tax on leases on a net basis. As a result of these amendments, the Company has recognised a separate deferred tax asset in relation to its lease liabilities and a deferred tax liability in relation to its right-of-use assets. Since, these balances qualify for offset as per the requirements of paragraph 74 of Ind AS 12, there is no impact in the balance sheet. There was also no impact on the opening retained earnings as at 1 April 2022.

2.3 Significant accounting judgements, estimates and assumptions.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Company's accounting policies, there are no significant judgements established by the management.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market change or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(i) Useful life of property, plant and equipment

The Company uses its technical expertise along with historical and industry trends for determining the economic life of an asset/component of an asset. The useful lives are reviewed by management periodically and revised, if appropriate. In case of a revision, the un-amortized depreciable amount is charged over the remaining useful life of the assets.

(All amounts in INR lakh, unless otherwise stated)

(ii) Defined benefit plans

The cost of the defined benefit gratuity plan is determined using actuarial valuations. An actuarial valuation involves various assumptions that may differ from actual developments in the future. These include the determination of the discount rate; future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
Further details about gratuity obligations are given in **Note 16**.

(iii) Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the nature of business differences arising between the actual results and the assumptions made, or future changes to such assumptions could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions based on reasonable estimates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing Interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective domicile of the companies.

(All amounts in INR lakh, unless otherwise stated)

Bank Guarantees (Sub limit of term loan)	-	500	-	-
Total	**1,200**	**10,079**	**791**	**5,899**

The quarterly returns filed by the company with banks are in agreement with the books of account

Note C: Loan from related party- Motherson Techno Tools Private Limited

Amount: INR : 5,260 lakh

Tenure: Six years

Rate of interest: 9.5% per annum (i.e. repo rate 6.5% + 3.0%), payable monthly
(Any change in Repo rate during any month, interest rate will be revised w.e.f. 1st day of next month)

Repayment: Monthly/quarterly repayments with last installment payable on 31 March 2030

(All amounts in INR lakh, unless otherwise stated)

16. Provision for employee benefit obligations

	As at 31 March 2024		As at 31 March 2023	
	Current	Non-current	Current	Non-current
Gratuity	1	43	1	41
Leave encashment	2	29	2	26
Total	**3**	**72**	**3**	**67**

The long term defined employee benefits and contribution schemes of the Company are as under:

A. Defined benefit schemes

Gratuity

Every employee is entitled to a benefit equivalent to fifteen days' salary last drawn for each completed year of service in line with the Payment of Gratuity Act, 1972. The same is payable at the time of separation from the Company or retirement, whichever is earlier. The benefits vest after five years of continuous service. The plan is unfunded.

The reconciliation of opening and closing balances of the present value of the defined benefit obligations are as below:

i) Present value of defined benefit obligation	For the year ended 31 March 2024	For the year ended 31 March 2023
Obligations at year beginning	42	69
	-	-
Service cost - current	16	18
Interest expense	3	4
Amount recognised in statement of profit and loss	**19**	**22**
Remeasurements		
Acturial (gain)/ loss on obligation	(9)	(15)
Amount recognised in other comprehensive income	**(9)**	**(15)**
Effect of exchange rate change		
Benefit payments	(10)	(33)
Addition due to transfer of employees	-	-
Obligations at year end	**41**	**42**

ii) Assets and liabilities recognized in the balance sheet

	For the year ended 31 March 2024	For the year ended 31 March 2023
Present value of the defined benefit obligations	41	42
Fair value of the plan assets	-	-
Amount recognized as Liability	**41**	**42**

iii) Defined benefit obligation cost for the year:

	For the year ended 31 March 2024	For the year ended March 31, 2023
Service cost - current	16	18
Interest cost	3	4
Actuarial (gain)/ loss on obligation	(9)	(15)
Net defined benefit obligations cost	**9**	**7**

iv) Actuarial assumptions:

	For the year ended 31 March 2024	For the year ended March 31,2023
Discount rate per annum	7.0%	7.3%
Future salary increases	8.0%	8.0%

Note: Estimate of future increases considered in actuarial valuation takes account of inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

v) Sensitivity analysis

The sensitivity of defined benefit obligation to changes in the weighted principal assumptions is :

	Change in assumption		Impact	Increase in assumption		Impact	Decrease in assumption	
	31 March 2024	March 31, 2023		31 March 2024	March 31, 2023		31 March 2024	March 31, 2023
Discount rate per annum	0.50%	0.50%	Decrease by	(3)	(3)	Increase by	4	3
Future salary increases	1.0%	1.0%	Increase by	7	7	Decrease by	(6)	(6)

The above sensitivity analysis is based on a change in assumption while holding all the other assumptions constant. In practice, this is unlikely to occur, and change in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in balance sheet.

vi) Risk exposure

The gratuity scheme is a final salary defined benefit plan that provides for lump sum payment made on exit either by way of retirement, death, disability, voluntary withdrawal. The benefits are defined on the basis of final salary and the period of service and paid as lump sum at exit. The plan design means the risk commonly affecting the liabilities and the financial results are expected to be:

(a) Interest rate risk: The defined benefit obligation calculated uses a discount rate based on government bonds, if bond yield fall, the defined benefit obligation will tend to increase.

(b) Salary inflation risk: Higher than expected increases in salary will increase the defined benefit obligation.

(c) Demographic risk: This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligation is not straight forward and depends upon the combination of salary increase, discount rate and vesting criteria . It is important not to overstate withdrawals because in the financial analysis the retirement benefit of a short career employee typically costs less per year as compared to long career employee.

vii) Defined benefit liability and employer contributions

Weighted average duration of the defined benefit obligation for FY 2023-24 is 15 years (FY 2023-24: 12 years)

	Less than a year	Between 1-2 years	Between 2-5 years	Over 5 years	Total
For year ended 31 March 2024					
Defined benefit obligation (gratuity)	1	2	10	40	**53**
	-	-	-	-	
For year ended 31 March 2023	1	2	10	31	**44**
Defined benefit obligation (gratuity)					

B. Defined contribution schemes

The Company deposits an amount determined at a fixed percentage of basic pay every month to the State administered Provident Fund, Employee State Insurance (ESI) for the benefit of the employees.

Amount recognised in the 'Statement of profit and loss' is as follows (refer Note 27):

	For the year ended 31 March 2024	For the year ended 31 March 2023
Provident fund paid to the authorities	43	42
Employee state insurance paid to the authorities	3	3
	46	**45**

17. Deferred tax (liabilites)/assets (net)

Year ended 31 March 2024	As at 01 April 2023	Charge/ (credit) to Statement of Profit and Loss #	Charge/(credit) to other comprehensive income	MAT credit utilised	As at 31 March 2024

18 Current borrowings

	As at 31 March 2024	As at 31 March 2023
i) Secured		
Working capital loans repayable on demand- from Kotak Mahindra Bank Limited (refer Note A)		
Indian rupee loan (cash credit)	791	462
Current maturities of long term borrowings (refer Note 15)	-	1,652
Unsecured		
Loan from related parties (refer Note B)		
Indian rupee loan	2,510	-
	3,301	**2,114**

Note A: Working capital loans repayable on demand- from Kotak Mahindra Bank Limited
Nature of security
1. First and exclusive charge on all existing and future movable fixed assets of the company (refer Note 38)
2. Corporate guarantee of the holding company

EMIs: INR 793 lakh (March 31, 2023 : INR 461 lakh)
Rate of interest: 8.5 % per annum payable monthly (i.e. repo rate + 2.0% with quarterly reset)
Quarterly returns/statements of current assets filed by the company with bank are in agreement with books of account.
Note B: Loan from related parties- Motherson Techno Tools Private Limited
Amount: INR : 5,260 lakh
Tenure: Six years
Rate of interest: 9.5% per annum compounded yearly (i.e. repo rate 6.5% + 3.0%), payable monthly
(Any change in Repo rate during any month, interest rate will be revised w.e.f. 1st day of next month)

Repayment: Monthly/quarterly repayments with last installment payable on 31 March 2030

19. Trade payables

	As at 31 March 2024	As at 31 March 2023

As auditor:		
Audit fees	1	1
Limited review & others	1	1
Total	**2**	**2**

31. Reconciliation of tax expense with the effective tax rate

	For the year ended 31 March 2024	For the year ended 31 March 2023
Profit/(loss) before income tax expense	(363)	(1,099)
Income tax rate of 25.168%*	25.168%	25.168%
Tax calculated as applicable rate	**(91)**	**(277)**
Tax effect of amounts which are not deductible (taxable) in calculating taxable income	-	16
Unrecognised deferred tax for the year	91	282
Impact of losses and unabsorbed depreciation for earlier years		(22)
Income tax expense	-	-

*income tax expense recognised in profit and loss is Nil as the Company does not have taxable income.

32. Earnings per share

	For the year ended 31 March 2024	For the year ended 31 March 2023
a) Basic earnings per share		
Net profit/ (loss) after tax available for equity shareholders	(363)	(1,099)
Weighted average number of equity shares used to compute basic earnings per share	99000000	99000000
Basic earnings per share (absolute figures)	**(0.37)**	**(1.11)**

The Company does not have any potential equity shares and thus there is no diluted EPS.

(All amounts in INR lakh, unless otherwise stated)

33. Fair value measurements

i. Financial instruments by category

	For the year ended 31 March 2024			For the year ended 31 March 2023		
	FVPL	**FVOCI**	**Amortised cost**	**FVPL**	**FVOCI**	**Amortised cost**
Financial assets						
i. Trade receivables*	-	-	1,789	-	-	1,339
ii. Cash and cash equivalents*	-	-	-	-	-	-
iii. Bank balances other than (ii) above*			1			1
iv. Loans*	-	-	-	-	-	-
v. Other financial assets*	-	-	289	-	-	275
Total financial assets	**-**	**-**	**2,080**	**-**	**-**	**1,615**
Financial liabilities						
i. Borrowings*	-	-	5,951	-	-	5,817
ii. Trade payables*	-	-	1,886	-	-	1,209
iii. Other financial liabilities*	-	-	300	-	-	639
Total financial liabilities	**-**	**-**	**8,137**	**-**	**-**	**7,665**

*The carrying amounts of trade receivables, cash and bank balances, loans, short term borrowings, trade payables and other current financial assets and liabilities are considered to be the same as face values.

ii. Fair value of non current financial assets and liabilities measured at amortised cost

	For the year ended 31 March 2024		For the year ended 31 March 2023	
	Carrying amount	**Fair value**	**Carrying amount**	**Fair value**
Financial assets				
Other financial assets	285	285	271	271
Loan to employees	-	-	-	-
	285	**285**	**271**	**271**
Financial liabilities				
Borrowings*	2,650	2,650	3,703	3,703
	2,650	**2,650**	**3,703**	**3,703**

*The fair value of non-current financial assets and financial liabilities carried at amortized cost is substancially same as their carrying amount.

iii. Valuation technique used to determine fair value

The fair value of the financial instruments is determined using discounted cash flow analysis.

(All amounts in INR lakh, unless otherwise stated)

34. Financial risk management

The Company is engaged in the business of manufacturing and selling of automobile parts and is exposed to market risks, credit risk and liquidity risk as with any other manufacturing process. This makes it necessary to have an organised risk management system. The adherence to regulations, instructions, implementational rules through planning, controlling and collectively monitoring along-with regular communication throughout the tightly woven management process form the base of the risk management system.

Market risk:
Market risk is the risk that the fair value of future cash flows of financial instruments will fluctuate because of changes in market price/rate. Market risk comprises: Price risk, Foreign currency risk, Interest rate risk, sensitivity analysis, Credit risk and Liquidity risk.

A Price risk:
Fluctuation in commodity price affects directly and indirectly the price of raw material used by the Company in its products. Substantial pricing pressure from customers to give price cuts and inability to pass on the increased cost to customers may also affect the profitability of the Company. The key raw material for the Company’s business is aluminium. However, there is no substantial fluctuations in prices of aluminium hence, the Company has not entered into forward contracts to hedge aluminium prices.

B Foreign currency risk:
Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company’s exposure to the risk of changes in foreign exchange rates relates primarily to the Company’s operating activities (when revenue or expense is denominated in a foreign currency).
The company does not have any derivative instruments outstanding at the end of reporting periods and further unhedged foreign currency exposure is given as follows:

(i) Particular of unhedged foreign exposure as at the reporting date (net exposure to foreign currency risk)

Currencies	As at 31 March 2024		As at 31 March 2023	
	Payable / (receivable)		Payable / (receivable)	
	Amount in foreign currency	Amount in INR	Amount in foreign currency	Amount in INR
United State Dollar (USD)	(2)	(130)	2	185
EURO	(3)	(245)	(3)	(231)
GBP	0	21		
Japanese Yen (JPY)	28	16	55	33

C Interest rate risk:
Interest rate risk is the risk that the fair value of future cash flows of the financial instruments will fluctuate because of changes in market interest rates.

	For the year ended 31 March 2024	For the year ended 31 March 2023
Variable rate borrowings*	5,951	5,817
Fixed rate borrowings	-	-
Total borrowings	**5,951**	**5,817**

*Interest rate shall be floating for the entire loan tenure and is linked to RBI repo rate with quarterly reset
An analysis by maturities is provided in note (E (i)) Maturities of financial liabilities below.

(ii) Sensitivity analysis
For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year.

	Impact on profit after tax	
	For the year ended 31 March 2024	For the year ended 31 March 2023
Interest rates-increase by 50 basis points*	30	29
Interest rates-decrease by 50 basis points*	(30)	(29)

* Holding all other variables constant

D Credit risk:
The credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations towards the Company and arises principally from the Company's receivables from customers and deposits with banking institutions. The maximum amount of the credit exposure is equal to the carrying amounts of these receivables.
The adherence of all clients to payment due dates is monitored on an on-going basis, thereby practically eliminating the risk of default. The Company has deposited liquid funds at banking institutions in India. In long term credit ratings these banking institutions are considered to be investment grade.

(All amounts in INR lakh, unless otherwise stated)

E Liquidity risk:

The liquidity risk encompasses any risk that the Company cannot fully meet its financial obligations. To manage the liquidity risk, cash flow forecasting is performed in the Company . The Company's finance monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities / overdraft facilities at all times so that the Company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.

(i) Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities:

For the year ended 31 March 2024	Upto 1 year	1 to 5 years	More than 5 years	Total
Borrowings	3,301	2,650	-	**5,951**
Lease liabilities	245	1,779	1,314	**3,338**
Trade payables	1,886	-	-	**1,886**
Other financial liabilities	300	-	-	**300**
Total non-derivative liabilities	**5,732**	**4,429**	**1,314**	**11,474**

For the year ended 31 March 2023	Upto 1 year	1 to 5 years	More than 5 years	Total
Non-derivatives				
Borrowings	2,114	3,703	-	**5,817**
Lease liabilities	185	1,427	1,884	**3,496**
Trade payables	1,209	-	-	**1,209**
Other financial liabilities	639	-	-	**639**
Total non-derivative liabilities	**4,147**	**5,130**	**1,883.96**	**11,161**

35. Capital management

(a) Risk management

The Company's objectives when managing capital is to safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and maintain an optimal capital structure to reduce the cost of capital. Consistent with others in the industry, the Company monitors NET Debt to EBITDA ratio i.e. Net debt (total borrowings net of cash and cash equivalents) divided by EBITDA (Profit before tax plus depreciation and amortization expense plus finance costs).

Currently the company's net debt to EBITDA ratio is negative due to business losses. The Net Debt to EBITDA ratios were as follows:

	For the year ended 31 March 2024	For the year ended 31 March 2023
Net Debt	5,951	5,817
EBITDA	1,822	1,044
Net Debt to EBITDA	**3.27**	**5.57**

(b) Loan covenants

Under the terms of the major borrowing facilities, the Company is required to comply with certain financial covenants and the Company has complied with those covenants throughout the reporting period.

SAMVARDHANA MOTHERSON AUTO COMPONENT PRIVATE LIMITED

CIN: U31500MH2014PTC388654

Notes to the financial statements for the year ended 31 March 2024

36. Related party disclosures

I. Related party disclosures, as required by Ind AS 24, “Related Party Disclosures”, are given below:

(1) Entities having control over the company :

Samvardhana Motherson International Limited (Formerly known as Motherson Sumi Systems Limited) (SAMIL)- Holding company

(2) Key Management Personnel of the reporting entity or of a parent of the reporting entity

Directors:

1 Mr. Ashok Tandon
2 Mr. Jitender Mahajan
3 Mr. Vishal Swarupshyam Kabadi

Other KMP:

1 Bhupender Agrawal (CFO w.e.f. December 22, 2023)
2 Ashima Arora (CS, w.e.f. December 22,2023)
3 Manoj Kumar (Manager)
4 Kapil Khattar (CFO till August 17, 2023)
5 Mr. Mayank (CS till June 14, 2023)

KMPs of Samvardhana Motherson International Limited (formerly Motherson Sumi Systems Limited) (Holding Company)

1 Mr. Vivek Chaand Sehgal
2 Mr. Laksh Vaaman Sehgal
3 Mr. Shunichiro Nishimura (Resigned from the Board effective from July 18, 2023)
4 Mr. Gautam Mukherjee (Ceased as Director effective from March 31, 2024)
5 Mr. Naveen Ganzu
6 Ms. Rekha Sethi
7 Mr. Robert Joseph Remenar
8 Ms. Veli Matti Rutsala
9 Mr. Norikatsu Ishida
10 Mr. Pankaj Mital
11 Mr. Kunal Malani
12 Mr. Alok Goel

(3) Subsidiaries of entities having control over the Company (with whom transactions have taken place)

Motherson Consultancies Service Limited
(Amalgamated with Samvardhana Motherson International Limited with 01 April 2022 as the appointed date and 05 December 2023 as effective date.)
Samvardhana Motherson Maadhyam International Limited

41. Due to Micro and Small enterprises

The Company has written to its suppliers to intimate the status as micro and small enterprise in terms of "Micro, Small and Medium Enterprises Development Act 2006"and to provide a copy of their registration certificate. The Company has shown below dues if any to micro and small enterprises registered under Micro, Small and Medium Enterprises Development Act, 2006 ('MSMED Act') and a separate disclosure of the same is given in Trade Payables. The disclosures pursuant to the said MSMED Act is as follows:

Particulars	For the year ended 31 March 2024	For the year ended 31 March 2023
Principal amount due to suppliers registered under the MSMED Act and remaining unpaid as at year end	22	77
Interest due to suppliers registered under the MSMED Act and remaining unpaid as at year end	-	-
Principal amounts paid to suppliers registered under the MSMED Act, beyond the appointed day during the year	34	-
Interest paid, other than under Section 16 of MSMED Act, to suppliers registered under the MSMED Act, beyond the appointed day during the year	-	-
Interest paid, under Section 16 of MSMED Act, to suppliers registered under the MSMED Act, beyond the appointed day during the year	-	-
Interest due and payable towards suppliers registered under MSMED Act, for payments already made	-	-
Further interest remaining due and payable for earlier years	-	-

* Interest was not paid to supplier as the delays were mainly due to Procedural delays like delivery & installation, quality of material, sample approval issue and prolonged discussions with the suppliers.

42. Disclosure under Ind AS 115 - Revenue from contracts with customers

The Company has adopted Ind AS 115 Revenue from Contracts with Customers from 1 April 2018 which resulted in changes in accounting policies and adjustments to the amounts recognised in the financial statements. In accordance with the transition provisions in Ind AS 115, the Company has adopted the new rules modified retrospectively .

A) There are no provisions for doubtful debts during the year.

B) Disaggregation of revenue from contracts with customers

	Revenue by major product lines		
	Sale of product	11,378	9,322
	Sale of services		
	Total revenue from contract with customers	**11,378**	**9,322**
C)	**Timing of revenue recognition**		
	At a point in time	11,378	9,322
	Over time		
	Total revenue from contract with customers	**11,378**	**9,322**

D) Contract balances

The following table provides information about receivables and contract liabilities from contracts with customers.

	For the year ended 31 March 2024	For the year ended 31 March 2023
Receivables	1,789	1,339
Contract liabilities (advance from customer)	69	209

(All amounts in INR lakh, unless otherwise stated)

43. Disclosure under Ind AS 116 Leases

Company as a lessee

The company has lease contracts for building and various items of vehicles and other equipment used in its operations. Leases generally have lease terms between 2 and 10 years. The company's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the company is restricted from assigning and subleasing the leased assets and some contracts require the Company to maintain certain financial ratios. There are several lease contracts that include extension and termination options and variable lease payments, which are further discussed below.

The company also has certain leases with lease terms of 12 months or less. The Company applies the 'short-term lease' and 'lease of low-value assets'recognition exemptions for these leases

Set out below are the carrying amounts of right-of-use assets recognised and the movements for FY 2023-24:

Particulars	Building	Machineries	Motor vehicles	Total
As at 01 April 2023	**2,897**	**-**	**38**	**2,935**
Additions	-	-	14	14
Deletions due to termination of contracts	-		(17)	(17)

Set out below are the carrying amounts of right-of-use assets recognised and the movements for FY 2022-23:

Particulars	Building	Machineries	Motor Vehicles	Total
As at 01 April 2022	3,271	8	46	**3,325**
Additions	-		31	31
Deletions due to termination of contracts	-		(30)	(30)
Depreciation expense	374	8	9	391
Depreciation on deletions	-		-	-
As at 31 March 31 2023	**2,897**	**-**	**38**	**2,935**

Set out below are the carrying amounts of lease liabilities and the movements for FY 2023-24:

Particulars	Amount
As at 01 April 2023	140
Additions	14
Accretion of interest	319
Reduction due to termination of contracts	(13)
Payments	478
As at 31 March 2024	**8**
Current portion:-	**245**
Non current portion:-	**3,092**

Set out below are the carrying amounts of lease liabilities and the movements for FY 2022-23:

Particulars	Amount
As at 01 April 2022	250
Additions	31
Accretion of interest	309
Reduction due to termination of contracts	-
Payments	450
As at 31 March 2023	**140**
Current portion:-	**181**
Non current portion:-	**3,315**

The effective interest rate for lease liabilities is 12% for vehicles & 9% for others, with maturity between 2020-2025

The following are the amounts recognised in profit or loss for FY 2023-24:

Particulars	Amount
Depreciation expense of right-of-use assets	380
Interest expense on lease liabilities	319
Total amount recognised in profit or loss	**699**

The following are the amounts recognised in profit or loss for FY 2022-23:

Particulars	Amount
Depreciation expense of right-of-use assets	391
Interest expense on lease liabilities	309
Total amount recognised in profit or loss	**700**

	For the year ended 31 March 2024	For the year ended 31 March 2023
Short-term and/or low value leases		
Lease rent paid for vehicles	-	-
Lease rent paid for factory	2	2
Total	**2**	**2**

SAMVARDHANA MOTHERSON AUTO COMPONENT PRIVATE LIMITED
CIN: U31500MH2014PTC388654
Notes to the financial statements
44. Ratio Analysis and its elements

Ratio	Numerator	Denominator	For the year ended		% change	Reason variance for more than 25%
			31 March 2024	31 March 2023		
Current ratios	Current assets	Current liabilities	0.63:1	0.75:1	(16%)	Variance due to net impact of the following: (a)Increase in current maturity of borrowings resulting in higher current liability (b) Decrease in balance with govt authority resulting lower current asset
Debt- equity ratio	Debt	Share holder's equity	185.18:1	20.47:1	805%	Variance due to decrease in shareholders' equity due to loss in current year
Debt service coverage ratio	Earnings available of Debt service	Debt service	0.51:1	0.39:1	33%	Variance is combined effect of : (a) Decrease in loss for the current year due to higher component sales with better margin as compared to the previous year (b) Reduction in finance cost as loans from bank were prepaid.
Return on equity ratio	Net Profit	Share holder's equity	(1.44):1	0.44:1	(428%)	Impact is due to higher components & tool. Sale and improved margins during the year
Inventory turnover ratio	Cost of goods sold	Average inventories	6.63:1	7.99:1	(17%)	
Trade receivable turnover ratio	Revenue from contract with customers	Average trade receivable	7.40:1	9.05:1	(18%)	
Trade payable turnover ratio	Net credit purchases	Average trade payables	4.64:1	6.29:1	(26%)	Variance is due to to inhouse re-processing of raw material resulting in lower purchase of raw material.
Net capital turnover ratio	Revenue from contract with customers	Average working capital	(6.75):1	(2.87):1	135%	Variance due to increase in average working capital as a result of increase in in current asset by INR 331 lakh and increase in current liability by INR 1,432 lakh
Net Profit ratio	Net profit	Revenue from operations	(3%)	(9%)	(66%)	Variance is due to combined effect of increase in sale of high valued products to existing customer and reducing of other indirect expenses.
Return on capital employed	EBIT	Average capital employed	5%	(2%)	(356%)	Variance is due to combined effect of: The surge in component sales led to an uptick in gross margin accompanied by a reduction in the fixed cost percentage as compared to previous year.
Return on investment	PAT	Share holder's equity	**N.A**	**N.A**	**N.A**	

45. Other Statutory Information

i There are no proceedings that have been initiated or pending against the company for holding any Benami property under the Benami Transactions (Prohibition) Act, 1988 and rules thereunder.

ii There are no transactions with companies that are struck off under Section 248 of the Companies Act, 2013 or Section 560 of the Companies Act, 1956.

iii The Company does not have any charges or satisfaction which is yet to be registered with ROC beyond the statutory period.

iv The Company has not traded or invested in Crypto currency or Virtual Currency during year.

v The Company has not advanced or loaned or invested funds to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:
(a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company (Ultimate Beneficiaries) or
